

Success will be measured by **Meaningful Discovery Rate**, not just number of songs played

NORTH STAR METRIC

Meaningful Discovery Rate

FORMULA

New tracks w/ positive actions ÷ Total discovery plays

Does discovery create useful new listening — not just more plays?

KEY TAKEAWAY Success is not “*more songs played*” — it's users discovering music they **save, replay, and trust**.

FreshMix AI helps users discover new music through mood, activity, and freshness control

MVP FLOW

- 1 User opens FreshMix AI
- 2 Selects mood, activity & language
- 3 Adjusts freshness level
Familiar -> Fresh slider
- 4 AI generates a fresh-but-familiar queue
- 5 Saves, skips, or refreshes songs
Feedback improves mixes

FEATURE WIREFRAME

FreshMix AI

"Refresh my playlist, keep the vibe"

New Discovery

Why? similar mood + new artist

SaveSkipRefresh

WHY AI IS NEEDED

- Understands natural language
"like this, but less repetitive"
- Reads real-time context
Mood, activity, language, moment
- Balances familiar + fresh
Avoids songs that feel random
- Learns from feedback
Saves, skips, replays improve it

"Give me fresh Hindi indie songs for late-night work."

"Refresh my gym playlist with 60% new songs."

KEY TAKEAWAY AI turns discovery from *passive recommendations* into an *interactive music guide*.
