

Success will be measured by **Meaningful Discovery Rate**, not just number of songs played

NORTH STAR METRIC

Meaningful Discovery Rate

FORMULA

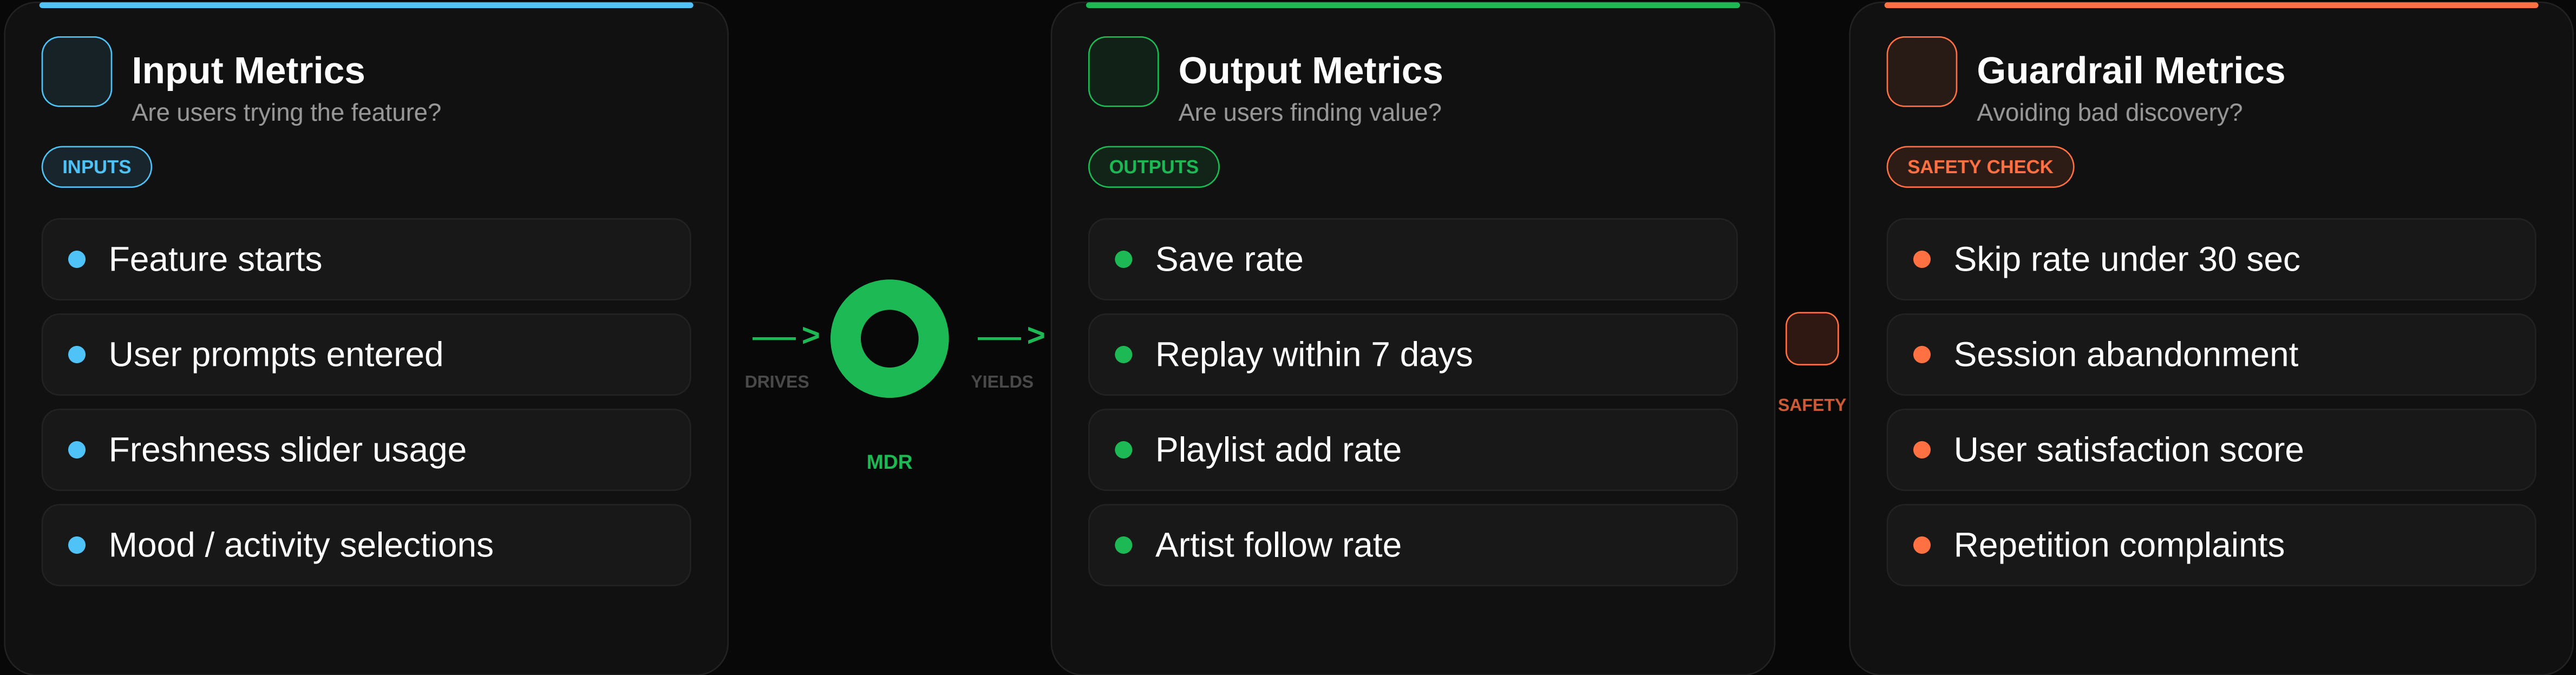

New tracks w/ positive actions

÷

Total discovery tracks played

WHY IT MATTERS

Measures whether discovery actually creates useful new listening — not just more plays.

KEY TAKEAWAY

Success is not “*more songs played*” — success is users discovering music they **save, replay, and trust**.

FreshMix AI helps users discover new music through mood, activity, and freshness control

MVP FLOW

- 1 User opens FreshMix AI
- 2 Selects mood, activity & language
- 3 Adjusts freshness level
Familiar <-> Fresh slider
- 4 AI generates fresh-but-familiar queue
- 5 Saves, skips, or refreshes songs
Feedback improves future mixes

"Give me fresh Hindi indie songs for late-night work."

"Refresh my gym playlist with 60% new songs."

WHY AI IS NEEDED

- Understands natural language
"like this playlist, but less repetitive"
- Reads real-time context
Mood, activity, language, and moment
- Balances familiar + fresh
Avoids songs that feel too random
- Learns from feedback
Uses saves, skips, replays to improve

KEY TAKEAWAY

AI turns discovery from *passive recommendations* into an **interactive music guide**.
