Steer how new vs. familiar it feels

7.8% (14)
5. Want explanation and trust

Low trust = 58% of root causes

10.1% (18)

What the reviews answer — by the numbers

- Q1. Why do users struggle to discover new music?

Low trust = 58% of root causes; 'bad recs' is the #1 frustration (10.1%). Discovery feels risky, not impossible.
- Q2. Most common frustrations with recommendations?

Bad recs 10.1% · Wrong mood 2.8% · Same songs 2.2% · Same artists 2.2% (P0 opportunity score 108).
- Q3. What listening behaviors are users trying to achieve?

Similar-but-fresh 5.6% · Mood-based 2.8% · Deep discovery 2.2% — situational discovery, not just 'new music'.
- Q4. What causes repeat listening of the same content?

Low trust 58% + fatigue 13% + taste bubble 13% of root causes — familiar feels safer than a risky new pick.
- Q5. Which segments face different discovery challenges?

Playlist loyalists (12) → fatigue · Passive (6) → risky · Mood (5) → wrong mood · Genre explorers (4) → shallow.
- Q6. What unmet needs emerge consistently?

Less-repetitive playlists 6.7% · Fresh-but-familiar 5.6% · Mood-aware 2.8% · Better control 2.2%.

Act first: P0 Bad recommendations (108) · P1 Same songs (36) · P2 Wrong mood (30) · P3 Same artists (16)

Final insight: users want discovery that is low-risk, mood-aware, and fresh without becoming random.
